Vitamin-und humidity cream	ml. 50	€ 70,00

All products are manufactured with alga concentrate of the algae and sea plants of the Thermal basin San Giovanni on the Elba Elba.

The products of this line are characterised by its high content on "JOD AND ORGANIC SULFUR", vitamins, proteins and iron. This is because of the biological and not reproducible conditions of the thermal basin.

In the micro powder of the algae and sea plants contains, iodine contained in the mud and the concentrate and organic sulfur have an extremely recreating and revitalising effect on the face skin, the scalp - as well as one welfare-ends effect with Cellulitis and on the micro circulation of the superficial blood vessels.

Alga powders, concentrate and Limo are completely unadulterated products.
